

## Scoresheet Baseball September 7<sup>th</sup>, 2009

Hi Again: There are now just 4 weeks of regular season games left after this report. Still, with most leagues having multiple divisions, along with wild cards also making the playoffs, about half the *Scoresheet* teams still have a realistic shot at making the playoffs. Best of luck to all of you still battling!

Also, while the trading deadline has passed, as has the deadline to turn in playoff lineups. **But, you CAN still make lineup changes for regular season games.** As always, we will use whatever new lineup you turn in for that week's games, and then if you

make the playoffs, we'll go back and use the lineup you had in effect for games the week of 9/7/09 thru 9/13/09 for the playoff games, or your special 'playoff only' lineup if you turned one in.

We are in the process of setting up *Scoresheet Hockey* leagues for the upcoming season. If you'd like to get into a hockey league please give us a call, or send us an e-mail, telling us to save a spot in a league for you. We will send you draft information as soon as we hear from you, and the player list and rules are also on our web site.

---

Listed below are teams from throughout **all** of Scoresheet (**in leagues of at least 8 teams**), who are leading the nation in these categories. These leaders are **just thru last week's games (games thru 8/30/09 only!)** - Jeff Barton
