

THIS YEAR, WHY NOT PLAY A FANTASY FOOTBALL GAME THAT IS MORE FUN THAN ANY OTHER?

'PLAY THE BEST'

SCORESHEET
SPORTS

Our computer does all the calculating, while you get the fun of running your own NFL team.

In *Scoresheet Football* your **players earn points for virtually everything** they do on the field; **not just when they score a touchdown**. Our realistic point formulas even deduct for passing and rushing attempts, and we also utilize individual defensive players! We are still the only game offering features such as **automatic substitution** of players who have a bye or who are injured. **We even sub for players who are injured early in the game!**

Here is our complete scoring system:

To help you judge a player's worth under our system, a listing of every player's *Scoresheet* point totals from last season, both per game played and for the entire year, are included in our draft packet.

No Change Fees: As long as you use our web lineup form to make lineup changes there are ***no* transaction fees**. So as long as you use the web to turn in changes the team fee will be your only cost for the season.

Join Alone or with Friends: You can join alone and we will put you in a league with other individual team owners. You can choose to be in a league drafting by sending ranking lists to our office, **or you can be in a web based draft where you will have the same control over the draft as if you were doing it live**. More info on web based drafting can be found at: www.scoresheet.com/football/web_drafting.html

If you enter with a couple of friends you can play in the same league. Or, if you already have a larger group you can sign up as a whole league. With your own league you can choose to have any number of teams in your league. You can do your own draft or can draft by sending ranking lists to our office or you can use our web based draft system to hold your draft.

Have the most fun: We have spent 19 years developing the most fun and realistic fantasy games available. At *Scoresheet* you will play in **real leagues**, where you will take part in an actual draft (meaning **a player can only be on one team in each league**.) You will participate in **real trade talks with other owners** in your league, and not just pick up players from a 'pool.' And each week of the season you'll compete in head-to-head games.

We give out \$150 every week to keep up interest even for teams who are 'out of the race'. But that is not why thousands of fans play *Scoresheet*—they play because they want to enjoy the best in fantasy sports. We hope you join us for what will be another great season of *Scoresheet Football*!
