

# SCORESHEET BASEBALL

Don't miss out on the fun of playing fantasy baseball this winter! Instead, re-live baseball from the mid-eighties as you draft, trade and manage players from the years 1988-1991.

How would you like to liven up this winter by having **Joe Carter** hit home runs for *your* fantasy baseball team? Or deciding if you want to trade **Jack Morris** for **Kirby Puckett**? Instead of spending the off-season with no baseball, now you can have all the fun of **drafting, trading and managing** a team of major league players from 30 years ago.

Join a National League and maybe you'll pick **Dale Murphy** to bat third, or **Lenny Dykstra** to bat leadoff. You could choose to spend your top pick on **Dwight Gooden**, or go for the great hitting of **Tony Gwynn**. In the American League, such players as **Stewart, Mattingly, Ripken** and **Eckersley** will all go in the first few rounds.

Just as in our regular *Scoresheet Baseball* game, your team will play complete simulated games, based on your players' major league performances from 1988-1991. Your league's draft will begin in early/mid November (depending on when you sign up), and will run until early December. Then the 12-week season runs from mid-December thru early March, taking you right up to spring training. We'll use 1988 stats for the first 3 weeks of the season, then 1989 stats for the next 3 weeks, 1990 stats for 3 more weeks, and 1991 stats for the final 3 weeks. Changing the stats used every three weeks will keep you supplied with fresh challenges, as you trade or change your lineup to get the most from your team. Of course, all the games are played on our computer - you get the fun of running your team while we do all of the work.

As in all of our games, a player can only be drafted by one team in each league. Once the draft is over, we have found that trading in these winter leagues hits a fever pitch. This is your chance to discuss blockbusters such as **Stieb** for **Fisk**, or **Darryl Strawberry** for a package of pitchers. You will get to see exactly how your trades work out as you read over your results each week. And to help refresh your memory of these past players, **we do print year by year statistics for each player in the draft packet.**

Your team will play **12 games a week, for a full 144 game schedule.** We'll send you a complete scoresheet for every game your team plays. **Games can also be viewed on the web in a text based play by play format.** You'll also receive: league standings, individual and team stats, trade offers and results, a weekly newsletter, league leaders, team-vs-team records, and the best and worst team stats in all of *Scoresheet*. League winners will be awarded trophies engraved with your name and accomplishment.

## TRY NEW STRATEGIES

Not only is this winter game a great memory trip, it also is a chance to test your theories of what wins baseball games. If you think that pitching is 90% of the game then you should certainly list a lot of pitchers at the top of your ranking sheet. Or if you are a fan of the 3-run homer, put sluggers such as **Fred McGriff** or **Kevin Mitchell** near the top of your list. Speed and defense will also play a big

part in each team's success - you'll have to balance a player's hitting with how much his defense helps (or hurts) your pitchers. (Fielding numbers as used in *Scoresheet* are also included for each player in the draft packet.) We have found that with player stats being known to all, these leagues have some very evenly matched teams, making for great pennant races.

Since the luck of unknown injuries isn't a factor, this is also a great game for testing your managerial ideas. You can really see the effects of various strategies controlling stealing, bunting, pinch hitting, earliest innings for pitchers, use of closers and setup men, and defensive replacements.

One of the best parts of this winter game is getting to know your fellow managers. Every year, our most knowledgeable and enthusiastic *Scoresheet* fans sign up to play. Virtually all of them are avid traders, especially since our 4-year format encourages trading to fill holes. You'll be playing with our most experienced team owners from throughout *Scoresheet*, and can find out what strategies have worked best for them.

## DRAFT THE STARS

We will be forming 10-team leagues of either American League or National League players only. Each league is split into 2 divisions. At the end of the season we play a League Championship Series, based on all 4 year's stats, between the two division winners (no wild cards!)

If you and your friends want to form a complete league and **draft among yourselves**, please feel free to call us and we can discuss your special needs. We are quite flexible, and **can run a league of any size for you, including a combined league** with players from both the A.L. and the N.L.

Before the season, you'll draft a 36-man team. The large roster, together with trading, allows you to cover each of the 4 years with both starters and backups. Each week, we limit your players to their playing time in an average 12 game span in the corresponding year in the majors. Thus a good bullpen and a strong bench are also important.

Winter baseball leagues that we form by putting individuals together in the same league will all draft using our web based draft system. If you have your own league of friends you can choose to do your own draft or you can use our web draft.

With web drafting you will enter a draft list on the web, and then you will be able to change your list as often as you like - between every pick if desired.

Our web based draft is **not** one where you have to log on during a set time slot to make a pick, and it is **not** a chat room draft where you have to log on for hours. Instead, as each team's pick comes up our program will pick the top available player from a list that you can change and save to the web at any time. By being able to make changes at any time you can adjust your list before every one of your picks, giving you the same control as if you were at a live draft.

Your draft list will be password protected so that only you can see it. As each pick is made it will be posted for everyone to see and your league roster will be updated.

The exact draft schedule for your league will be posted before the draft begins so that team owners know when each of their picks will be made. There is also a more detailed description of how this web based draft will work on our web site at:

[www.scoresheet.com/WB\\_WebDraft.php](http://www.scoresheet.com/WB_WebDraft.php)

**As soon as we receive your order form we will send you back complete drafting information.** The drafting packet lists all eligible players by position, sorted

accorded to at-bats or innings pitched in 1988 - 1991. **Summary stats are printed for each player**, including yearly batting average and home runs hit, at-bats or innings pitched,

ERA and fielding numbers.

Using these player lists, you'll rank the players in the order you want them. Deciding whether to draft a top pitcher such as **Tom Candiotti** or a great infielder such as **Ryne Sandberg** will have you reliving those great baseball days of 30 years ago.

*Scoresheet* will be forming leagues through the middle of November, with the first web drafts set to begin November 1st. Please send in your order form by the end of October to begin enjoying the winter baseball draft as soon as possible.

## AFFORDABLE FUN

Owning a *Scoresheet Baseball* winter franchise costs just \$64 for the **entire** season - trades and lineup changes are all free! If you join in a group of 4 or more the cost is only \$59 per team. The team fee is payable with your order form, or if you prefer you can pay \$35 with your order form and the remaining balance when your draft begins. Engraved trophies are awarded to all league winners.

Each week of the season (12 weeks of regular season play, plus a one week play-off), you'll receive reports which include everything you'd want to know about your team. The newsletter will relive all the big baseball events of the times.

The accompanying pages show a possible lineup using players from the 1988-1991 era, along with a sample game from a week using 1988 stats. Of course, your lineup will use the players you've drafted for your team; certainly some of your strategy decisions will be different from what we've chosen. But by looking at the accompanying sample lineups we hope you will get a feel for the kind of teams that will be playing *Scoresheet Baseball* this winter.

Send in your order form and begin planning now for the winter season! You can also order your team from our web site by using the winter baseball order form at: [www.scoresheet.com/WB\\_order.php](http://www.scoresheet.com/WB_order.php) As soon as we hear from you we'll send you the appropriate drafting information.

See how much fun playing fantasy baseball this winter can be. Don't go without baseball for the next few months. Instead, play ball with *Scoresheet Baseball* this off-season!
